Abstract. The abstract should briefly summarize the contents of the paper in 15–250 words summarizing the research question, method and main findings.

Keywords: First keyword · Second keyword · Another keyword.

1 Introduction

Introduction section with a Social Web related research questions & motivation [1].

2 Related Work

Literature section with a short overview of other papers discussion related questions or using related methods or data

3 Methodology

Method section discussing the method used to answer the research question, e.g. network analysis or other specific data analysis methods used

Data section discussing the data selection, collection and pre-processing performed prior to the analysis. You may use data visualizations to illustrate the properties of the data used.

4 Results

Result section discussing the outcomes of the analysis, including visualizations of the results

5   Conclusion

Conclusion section with a short summary of the main findings, Privacy & ethical consideration, data security Known limitations of your research

6   Appendix

Appendix with individual contribution descriptions, see Individual contribution assignment & rubric.
